HEIGHT (FEET)

If you don't find your height or weight on this chart, here's how to calculate your BMI in pounds and inches:

1. Multiply your weight (in pounds) by 703.
2. Multiply your height (in inches) by your height (in inches).
3. Divide the answer in step 1 by the answer in step 2 to get your BMI.

Example, using a person who is 5'2" and weighs 140 pounds:

1. $140 \times 703 = 98,420$
2. $62 \times 62 = 3,844$
3. $98,420 \div 3,844 = 25.6$
